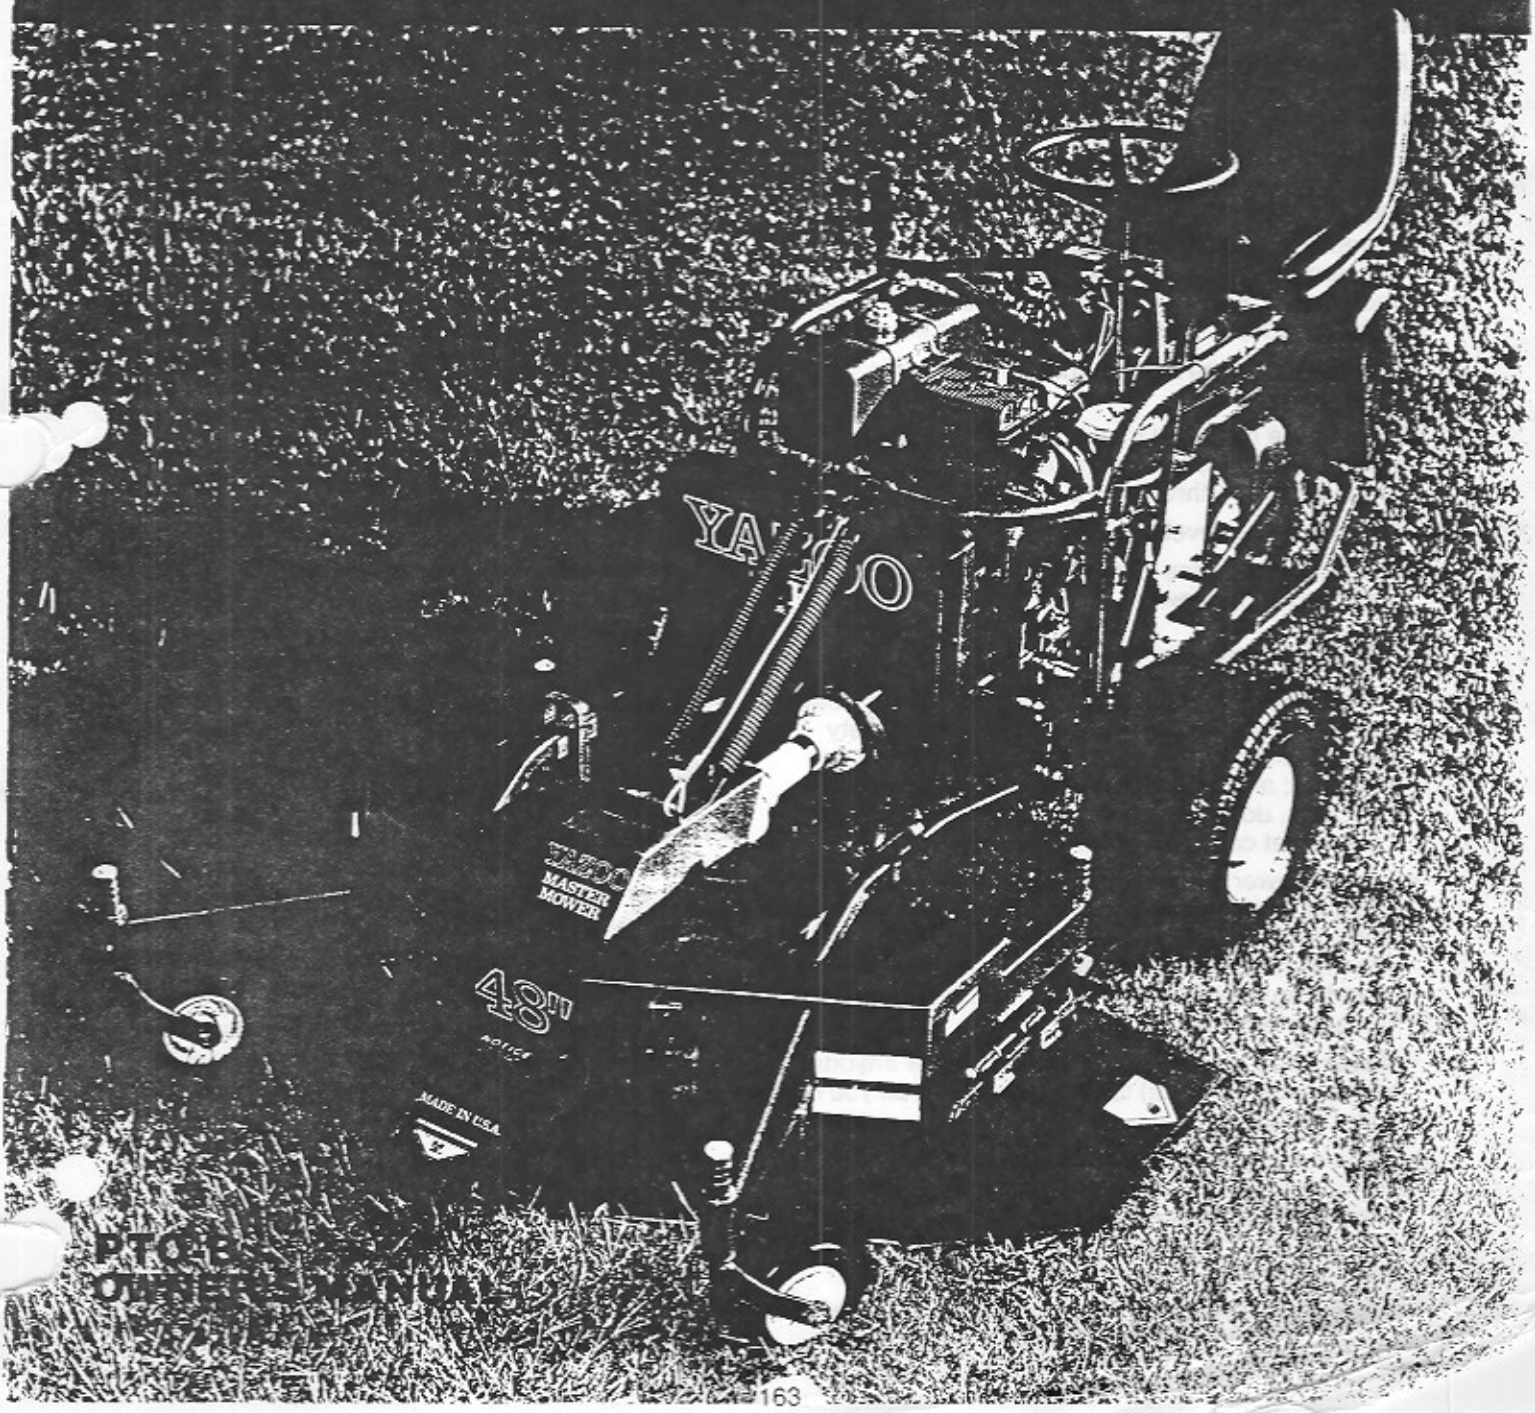
YAZOO

PTOB

1301-057

3-WHEEL RIDER



PTOB
OPERATOR'S MANUAL

WARNING! 95 out of 100 mowing accidents are caused by the way the machine is operated.

That's why you shouldn't even start the ignition of your new riding mower until you've read and **thoroughly understand** this Owner's Manual (particularly the safety rules).

Because the cutting head is out front and away from the operator, your Yazoo commercial mower is safe. Since the cutting head is out in front, you can see what you are cutting. Plus, with a Yazoo rider, you're protected by heavy-duty guards, as well as the engine itself, because it's located between you and the cutting blade.

This is a **commercial** riding mower—a heavy piece of equipment that is only as safe as its operator. You make the rules, so make mowing safety a habit in your family.

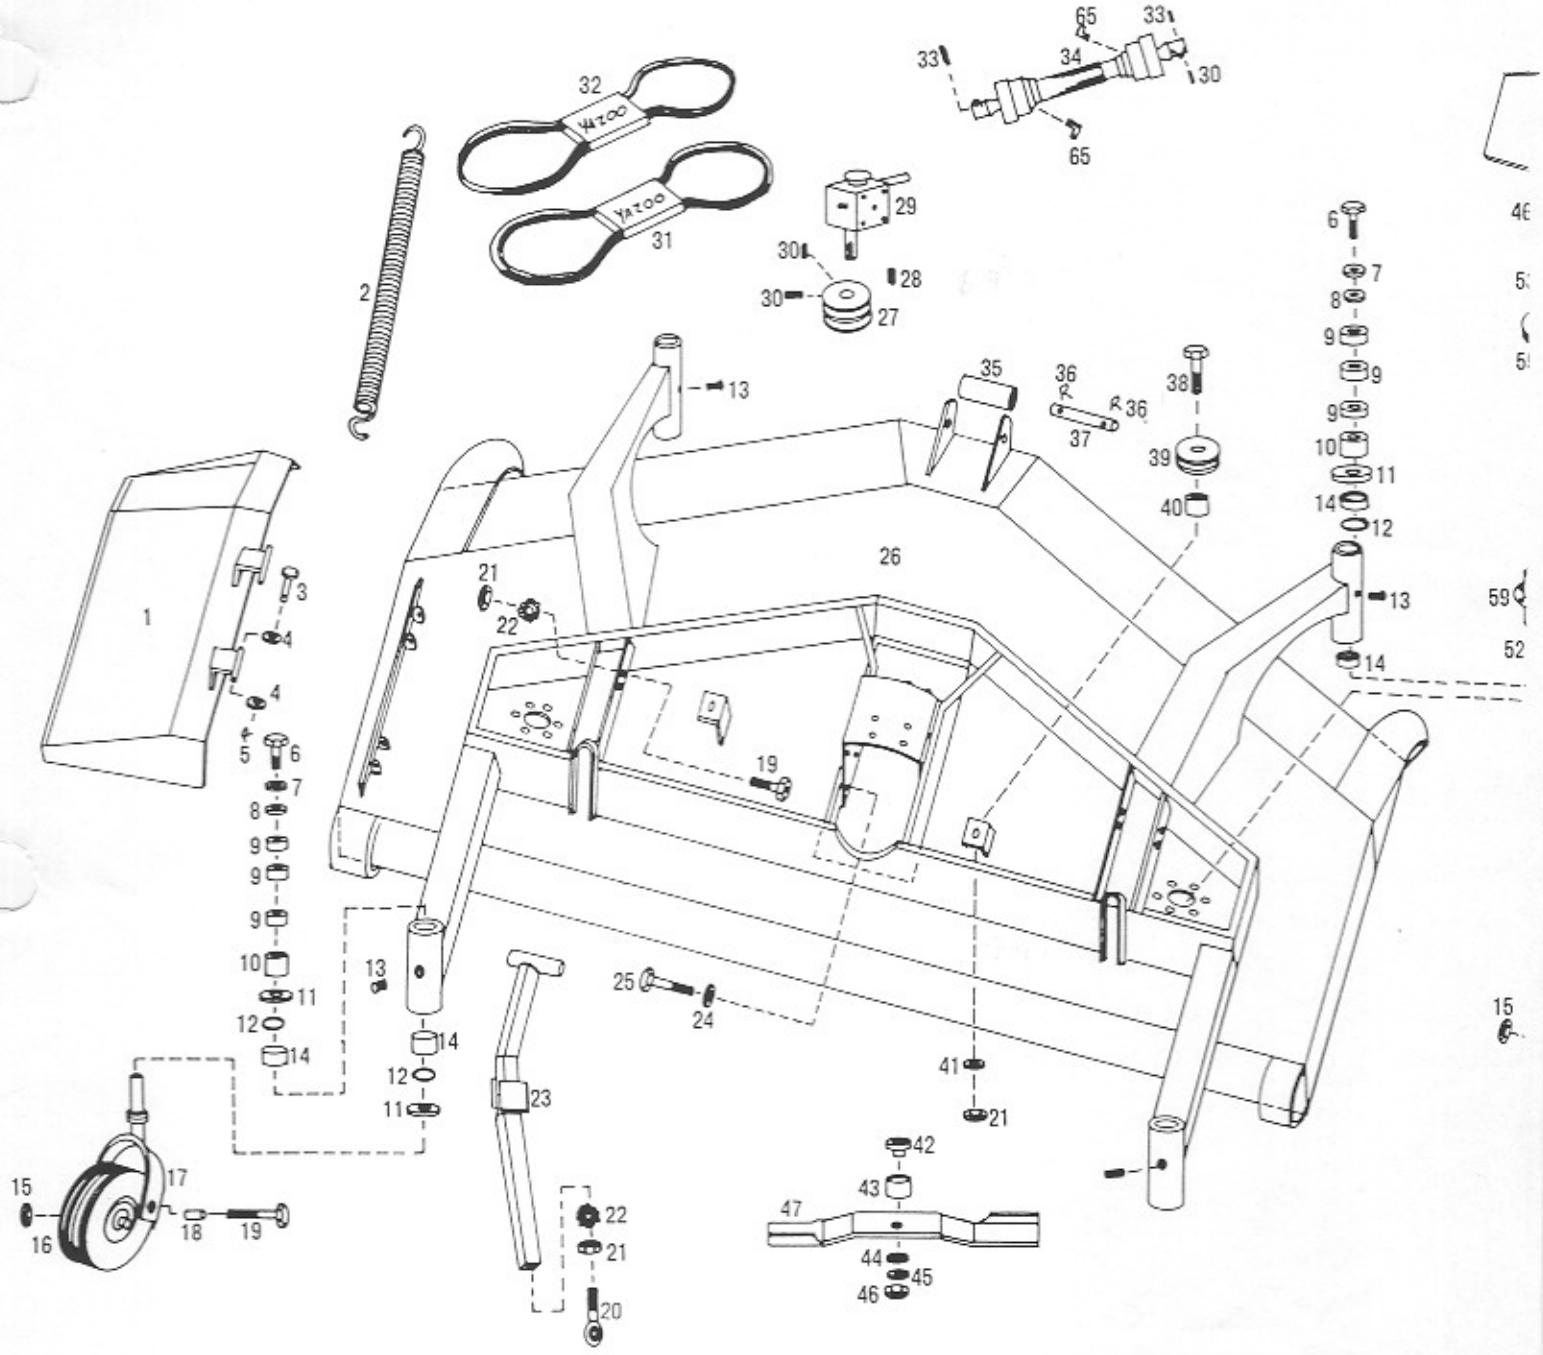
Owner's Responsibility

- Insist on a safety demonstration from your Yazoo dealer.
- Read this Owner's Manual thoroughly and understand how your mower works. **Make sure you know how to stop your engine quickly.** Know where the brakes are.
- Before you start your mower, detach the spark plug wire(s) and disengage the blade drive. Then inspect beneath the cutting section, making sure all blade nuts are tight, and no foreign object is caught underneath. Finally, check the entire mower and make sure that all nuts, bolts and parts are secure.
- Adjust the cutting height while the mower is on a level, firm surface.
- Inspect the intended mowing area and pick up any stones, sticks, bottle caps or other foreign objects which might be thrown by a mower.
- Check all fluid levels—oil, gas, hydro axle.
- Disengage clutches and blades and shift into neutral before starting mower.

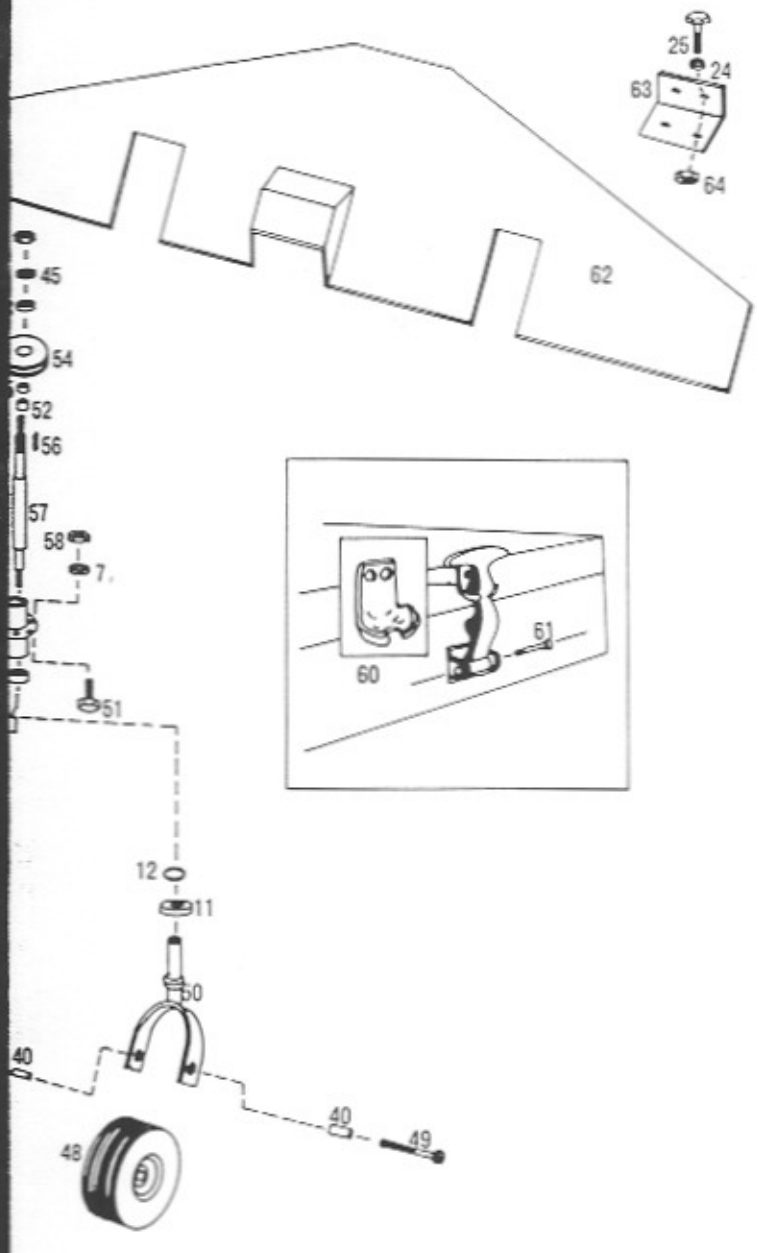
While Operating:

- Wear sensible clothing—long pants; boots or heavy shoes that will grip, even in wet weather; safety glasses to protect the eyes from low hanging branches; and thin gloves (like golfers') for a sure grip. Also, don't wear anything that's so loose that it might get caught on something.
- If your mower ever vibrates excessively or sounds unusual, shut off your engine, disconnect the spark plug(s) and disengage the blade drive. Then—and only then—look underneath the cutting section for something caught in the blade, or something that has been loosened or bent.
- **Never** carry passengers. And don't allow anyone (particularly children) to remain in the area you're about to mow.
- If someone should approach you, or if you need to get off your mower for any reason, shut off your engine completely—including blade drive and ignition. Do this manually, even though your mower has an operator presence control.
- The owner is responsible for keeping the operator presence control working properly.
- Do not alter or remove the safety guards or safety devices.
- Never operate your Yazoo rider at more than a 15-degree angle of bank. Most engines don't lubricate themselves properly at an angle greater than 15 degrees. Remember, too, that if you go over a root or bump, the angle of the mower will change, so allow plenty of margin to take care of the unexpected. **Most riding mower accidents happen on slopes of more than 15 degrees.**
- On slopes, mow across, not up and down. To control your Yazoo on slopes, use the foot brake as necessary. If the mower transaxle is suddenly jerked into reverse on a slope, the rear end of the mower may have a tendency to lift.
- Never let a child operate a mower. And never let anyone else operate your mower, unless he or she has received a complete course of instruction—including a safety demonstration—on how the mower operates and has read and understands the Operator's Manual.
- Do not race the engine; this is not only dangerous, it's harmful. Don't alter governor settings.
- Never mow at night, or other times when visibility is low.
- Never run the mower indoors where carbon monoxide fumes can collect.
- Handle gasoline with care. Never add fuel to a running engine. And when you run out of gas, give your engine time to cool down before refueling. Gasoline spilled on a hot engine is a fire hazard.
- Allow the engine to cool before storing rider in any enclosure such as a garage or storage shed.
- To reduce potential fire hazard, keep your mower free from build-ups of grass, grease, leaves and accumulations of dirt.

Maintain your Yazoo properly at all times. Check parts frequently and follow our maintenance and storage instructions.



PSG-48, PSG-60 AND PSG-76
CUTTING SECTION PARTS



No.	Part No.	Description
1	306-017	Chute, Guard PSG-48
	306-016	Chute, PSG-60

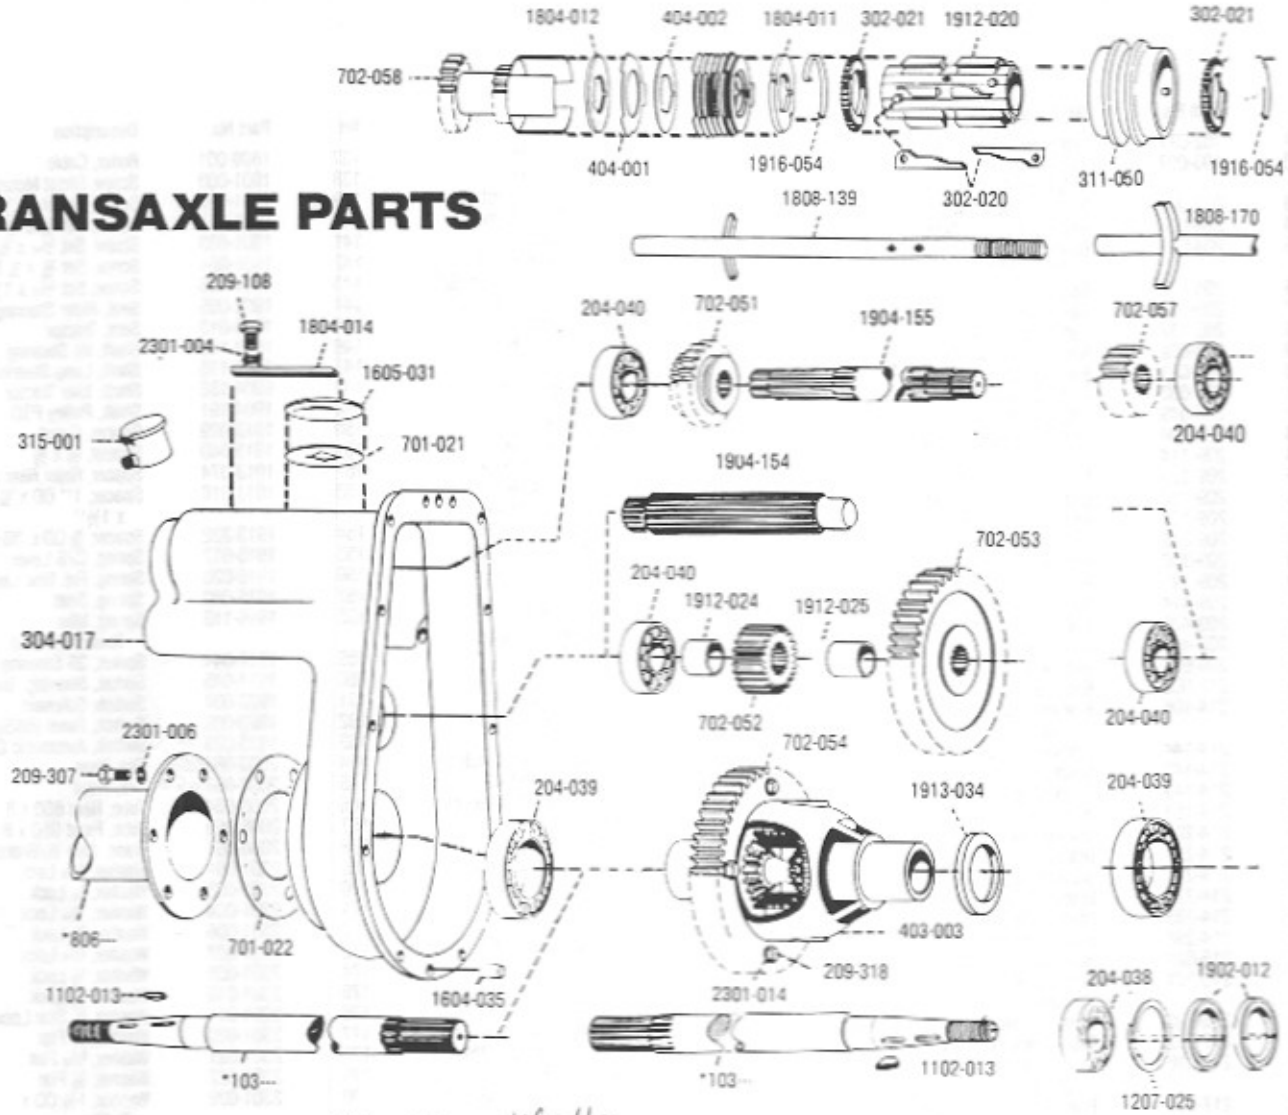
174	2301-008	Washer, ½ Lock
175	2301-010	Washer, ⅝ Lock
176	2301-011	Washer, ⅜ Star Lock
177	2301-020	Washer, ¼ Flat
178	2301-021	Washer, 5/16 Flat
179	2301-022	Washer, ⅜ Flat
180	2301-028	Washer, 1⅜ OD x ¾ ID
181	2301-045	Washer, Fibre 1⅜ OD x ¾ ID
182	2301-096	Washer, Concave
183	2301-097	Washer, Thrust
184	2301-284	Washer, Star Lock
185	2303-008	Wheel, Steering
186	2304-009	Weight, Rider
187	2305-018	Wheel, Rear Assy
188	2305-022	Wheel, Front Assy
189	2501-018	Yoke, Steering
190	2501-027	Yoke, 5/16-18th
191	2501-030	Yoke, ⅜"
192	1904-190-001	PTO Shaft, Male Section
	1904-190-002	PTO Shaft, Female Section (Cutting Section)

Key No. 127 ENGINE Pulley FOR STANDARD Replacement ENGINE With 1" C/S ~~SO~~ USE 1608-164

Clutch Gasket set 0701-087 Complete clutch 0310-020

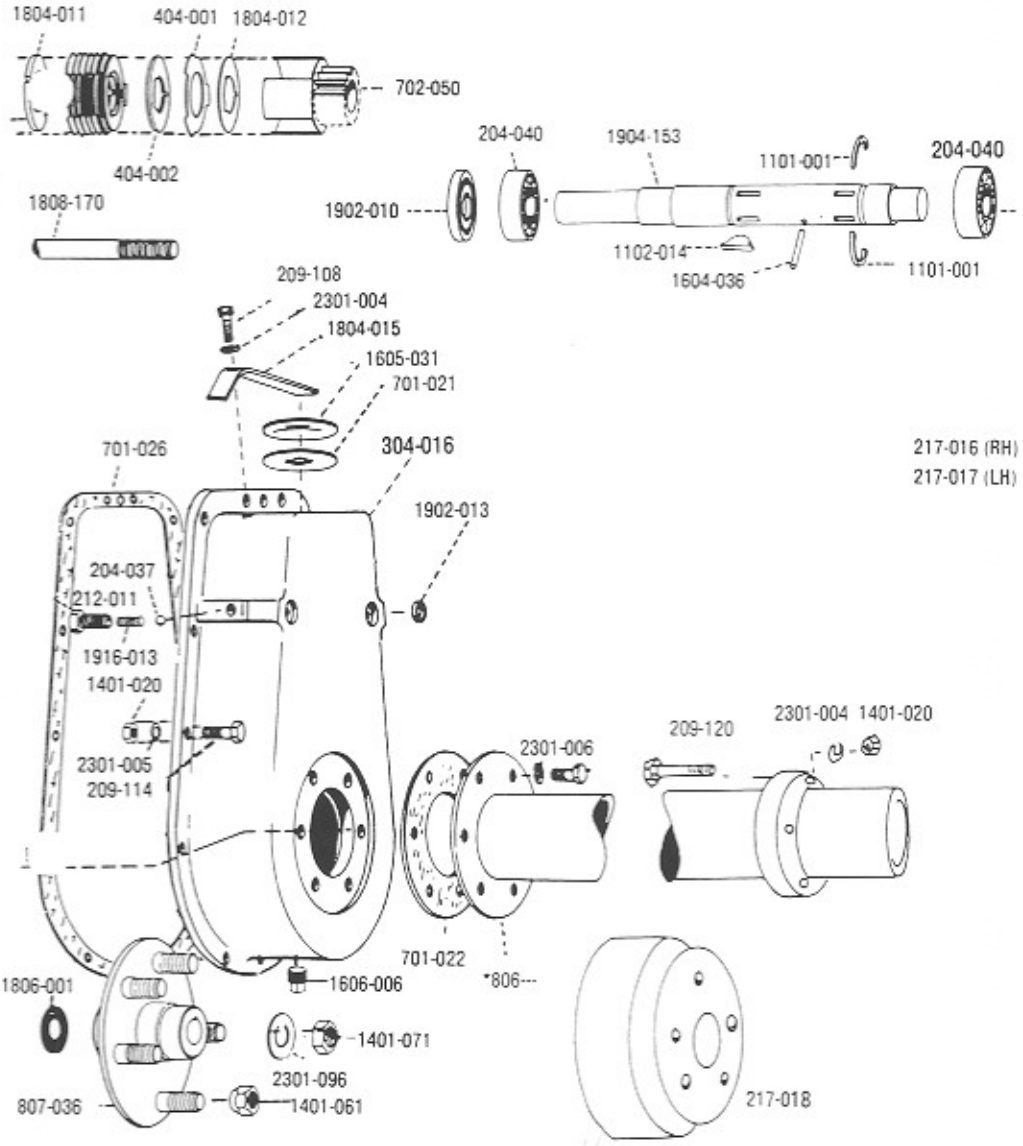
TRANSAXLE PARTS

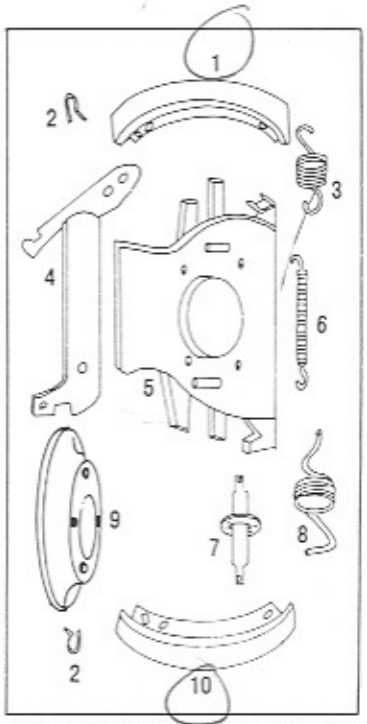


Part No.	Description
* 103-~~080~~ 082	Long axle
* 103-091	Short axle
204-037	Detent ball
204-038	Ball bearing
204-039	Diff. Carrior bearing
204-040	Ball bearing
209-108	5/16-18 x ¾" HH bolt
209-114	5/16-18 x 1" HH bolt
209-120	5/16 x 1¼" HH bolt
209-307	3/8-16 x ¾" HH bolt
209-318	3/8-24 x 1" HH Ht. bolt
212-011	Spring retainer bolt
217-018	Brake drum
217-016	Brake assembly (RH)
217-017	Brake assembly (LH)
302-020	Clutch dog cam
302-021	Clutch adjustment cam
304-016	Deep half case
304-017	Shallow half case, with transaxle brake
311-050	Selector collar
315-001	Oil breather cup

On the YR60, either modify this axle or order a new housing also.

403-003	Complete differential (less gear)
404-001	Outer disc (16 required)
404-002	Inner disc (14 required)
701-021	Inspection plate gasket
701-022	Axle housing gasket
702-050	Reverse gear
702-051	Hi-Low shift gear
702-052	Differential drive gear
702-053	Intermediate drive gear
702-054	Differential gear
702-057	Primary drive gear
702-058	Forward drive gear
* 806-090	Short axle housing
* 806-091	Long axle housing
807-036	Rider drive wheel hub
1101-001	Keeper, 2 Halves
1102-013	Woodruff key
1102-014	Hypro key
1207-025	Ring lock
1401-020	5/16-18 nut





At the time of printing, brake parts were available only as part of a complete kit. They are numbered for easier identification in case individual parts become available.

Brake Shoes -
1908-012
1908-013

1401-020	5/16-18 nut
1401-061	7/16" tapered nut
1401-071	5/8-18 full nut
1604-035	3/8" x 3/4" dowell pin
1604-036	Clutch retainer pin
1605-031	Oil fill inspection plate
1606-006	3/8" standard pipe drain plug
1804-011	Inner disc retainer
1804-012	Outer disc retainer
1804-014	Inspection plate retainer
1804-015	Inspection plate retainer
1806-001	3/4" I.D. x 1" O.D. ring
1808-139	Hi-Low selector rod, used with brake
1808-170	Forward & reverse selector rod, used with brake
1902-012	Axle seal
1902-013	Control rod oil seal
1904-153	Clutch shaft
1904-154	Splined shaft
1904-155	Intermediate drive shaft
1912-020	Clutch sleeve
1912-024	Short clutch sleeve
1912-025	Intermediate sleeve, long
1913-034	Differential spacer
1916-013	Detent spring
1916-054	Clutch adjusting spring
2301-004	5/16" lock washer
2301-005	5/16" ext. star lock washer
2301-006	3/8" lock washer
2301-014	3/8" Int. star lock washer
2301-096	5/8" cupped spring washer

310-020	Complete clutch
2006-061	Transaxle w/brake, PTO Wisconsin & PTO Briggs

*A check of parts list is required for complete part number
